At CUNY and Across America, October is...

This Month’s Theme: “Cyber Security Literacy”

There is no such thing as “enough” security. Maintaining personal and professional cyber security is a continuous effort. Cyber security literacy is the permanent application of computer safety principles that provide the capacity to anticipate and respond to newly emerging threats.

As cyber-citizens, we all must do our part to secure our computers and mobile devices, to practice appropriate safety precautions when online, and to stay informed of threats that may impact our personal and digital security.

A good place to begin your pursuit of cyber security literacy is by reviewing materials provided on the Department of Homeland Security Stop-Think-Connect website where you will find articles on the latest threats, helpful tips, video and podcast tutorials, and links to additional resources to keep yourself and your friends and family safe from cyber threats.

Know your risks. Stay informed. Stay safe online.
