College Statement and Statistics

*Director Randall Collins*

The Hunter College Campus Schools are administered under the auspices of Hunter College of The City University of New York. The campus schools are among the nation’s oldest and largest elementary and secondary schools for educating the intellectually gifted and serve a student population representative of the racial, ethnic and socioeconomic population of New York City. There are approximately 350 students in the elementary-school program and 1,200 students in the secondary-school program. Students are admitted at the kindergarten level in the elementary school and at the seventh grade in the secondary school. Far more students qualify and seek admission to the campus schools than can be admitted. Thus, educationally sound criteria are used to determine who is admitted.

The campus schools were established as laboratory schools to provide quality instructional programs and services and expand the base of knowledge that guides the provision of urban gifted education. The concept of and commitment to a laboratory school are imperative for professionals assigned to the campus schools. A laboratory school pursues innovative experiences directed to the quest for ways and means of maintaining and advancing a "state-of-the-art" approach to the education of students who have above-average academic aptitudes. Research and other scholarly explorations of topics that relate to the intellectual, psychological and social characteristics and factors pertinent to the education of these students are essential to the mission of the campus schools.
### Playground Resurfacing

**Phase:** DC  
**FY 2012 Request:** $750  
**Anticipated Completion:** June 2013

This project will resurface the deteriorating playground surface that is utilized by 1,600 K-12 students during each school day and by members of the community in the afternoons and on weekends. The surface is approximately 25,000 square feet.

### Student Restroom Renovations

**Phase:** DC  
**FY 2012 Request:** $400  
**Anticipated Completion:** April 2013

This project will begin to renovate 12 student restrooms that are original to the building. Renovations will include new tile, plumbing fixtures, partitions, ADA upgrades and other improvements. These facilities are used by the 1,600 students attending classes at the Campus Schools building, students attending evening college courses and visitors.

### Elevator Upgrades

**Phase:** DC  
**FY 2012 Request:** $345  
**Anticipated Completion:** August 2012

This project will upgrade the dated mechanical system and car of the elevator that serves the Hunter Campus Schools building. The five-story building was constructed in the late 1960s and has had few capital upgrades. Because this elevator is original to the building, when it breaks down, parts are extremely difficult to obtain, and it often is out of service for days at a time. Despite Hunter's commitment to an ongoing maintenance contract, the age of the equipment greatly decreases its reliability. The increasing lack of elevator service poses challenges for those unable to traverse multiple flights of stairs.

### Gymnasium Floor Replacement

**Phase:** DCE  
**FY 2012 Request:** $150  
**Anticipated Completion:** August 2012

The gymnasium floor is beginning to show its age. There are dead spots that impact the level of play, and several sections of the floor have required costly and detailed repairs to prevent trip hazards. The intent of this project is to replace the floor of the 6,700-square-foot facility and provide new game lines. This facility is used extensively by the 1,600 students attending the school as well as members of the community.

### Locker Replacement

**Phase:** DCE  
**FY 2012 Request:** $175  
**Anticipated Completion:** February 2012

More than 1,200 students attend Hunter College High School. The lockers in which they store their books and personal items are original to the circa 1970 building and are in varying states of disrepair. Efforts to maintain the aging lockers have not been very successful. Funding is requested to begin replacing these fixed lockers to provide students with properly functioning and safe book lockers.

### Reso-A Request FY 2012 Total

$1,820
