Pathways Transfer Majors Committees – Nursing

Meeting Date: October 28, 2011

Committee Members Present: Candy Dato (Chair) – New York City College of Technology; Alice Akan – Lehman College; Mary Ellen McMorrow – College of Staten Island; Jacqueline Nichols – Borough of Manhattan Community College; Lorraine Sanders – Hunter College

Committee members discussed what courses are needed at the entry level for both associate and generic baccalaureate degrees in nursing. There are similarities and variations in major requirements for different schools, therefore we will look at the requirements for each and every school. The goal is to identify 3 to 6 courses for pre-licensure nursing students at all CUNY nursing programs. A grid will be developed to input specific curriculum requirements for all of CUNY nursing programs, including Associate Degree, generic baccalaureate, and RN to BSN programs. Next meeting scheduled for November 11th at BMCC when we will discuss the findings and begin to look at requirements for RNBS programs.

Respectfully Submitted by:
Jacqueline Nichols (recorder)
